

Louisiana StaffID v3.0 Upload Format

File Name

The filenames of the Staff Batch File can contain upper/lower case alphanumeric characters, periods, underscores, or hyphens. Spaces and any other special characters are not allowed.

Record Types

The Staff Batch File should contain three different categories of information. The three categories of records are:

- Header Record
- Detail Record
- Trailer Record

The Header and Trailer record should be delimited by a single tab or space character. The Trailer should have no empty spaces or data after the last Trailer column.

Header Record Layout

The header record should always be the first record.

Each of the fields should be delimited in the header by the field name referenced below.

The header record contains the following fields:

FieldName	Delimiter	Required	Data Type	Notes/Format Details
Record Type		Yes	Char (2)	Always 'TH'.
Extract Date		Yes	Date (10)	Can be in one of the following formats: <ul style="list-style-type: none">• mm/dd/yyyy• m/d/yyyy• mm/d/yyyy• m/dd/yyyy
Extract Time		Yes	Time (8)	Must have a 'hh:mm:ss' format.
TransmissionID		Yes	VarChar(10)	This number can be utilized by the submitter for auditing as an identifier for the submission.
Version		Yes	Char (3)	Always '3.0'
Delimiter	delimiter=	Yes	VarChar (4)	Should be the character literal or the hex representation of the delimiter that is used in the detail records (either tab or comma). For a comma delimiter, the character literal would be 'delimiter=,' and the hex representation would be 'delimiter=0X2C'. For a tab delimiter, it is recommended that the hex representation be used. In that case, it would be 'delimiter=0X09'.

FieldName	Delimiter	Required	Data Type	Notes/Format Details
SourceName	source=	Yes	VarChar(3)	This should be a valid source system name. Batches will fail if the source name is not defined as in the Source System table. System administrators manage the Source System table. Examples: PEP CCCBC TCMS NSECD Compass
TextQualifier	qualifier=	No		Should be the text or the hex representation of the text qualifier that is used in the detail records. (DoubleQuote only)
BatchIndicator	batch_indicator=	No		The system will accept D for batch level indicator. D indicates an LEA Level File.

Trailer Record Layout

The Trailer record should always be the last record in the file.

The Trailer record **should be delimited** by a single tab or space character and there should be no extra spaces or data after the last column in the Trailer Record.

The Trailer record contains the following fields:

Field Name	Required	Data Type	Notes/FormatDetails
Record Type	Yes	Char(2)	Always 'TT'.
TransmissionID	Yes	VarChar(10)	An arbitrary number. Should match the Transmission ID in the header record.
Number of Records	Yes	VarChar(10)	Number of records in the file, including the 'TH' and 'TT' records. The value should be left aligned and not have any trailing spaces.

Detail Record Layout

The detail records should appear between the header and trailer records. Each of the fields should be delimited even if data is not available for certain fields.

These records should represent individual Staff data and should contain the following fields:
